<b>Note:</b>	STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.															<b>Note :</b> Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

1 Inclut le temps supplémentaire.

**Note:** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

1 Non désaisonnalisés, sauf les estimations de prestations régulières.

2 Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est disponible.

3 Comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.

4 Augmentation annuelle en % en vigueur des taux de base.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

1 Non désaisonnalisés, sauf les estimations de prestations régulières.  
 2 Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est disponible.

3 Comprennent tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.

4 Augmentation annuelle en % en vigueur des taux de base.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non saisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de l'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

1 Inclut le temps supplémentaire.

2 Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC's monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

1 Non désaisonnalisés, sauf les estimations de prestations régulières.

2 Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est disponible.

3 Augmentation annuelle en % en vigueur des taux de base.

4 Comprendront tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non saisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel.

- 2** Les données annuelles sont obtenues en calculant la moyenne des totaux mensuels sauf dans le cas du nombre de prestations et des demandes initiales et renouvelées pour lesquels on prend la somme. Une autre estimation annuelle du nombre de personnes visées par l'assurance-emploi, tirée des déclarations d'impôt de Revenu Canada, est disponible.
- 3** Augmentation annuelle en % en vigueur des taux de base.
- 4** Comprend tous les lock-out et les grèves, qu'ils soient légaux ou illégaux, d'une durée d'une demi-journée ou plus et représentant 10 jours-personnes ou plus de temps perdu. Le temps perdu par les travailleurs indirectement touchés, comme ceux qui sont mis à pied par suite de l'arrêt de travail d'autres employés, n'est pas compris.

<b>Note:</b>	STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.								<b>Note :</b>	Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

**2** Unadjusted for seasonality. Annual data are the averages of the monthly indexes. How these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.

1 Includes overtime.

2 Unadjusted for seasonality. Annual data are the averages of the monthly indexes. Now these fixed-weighted indexes are constructed is described in the September 1989 issue of the CEO.

Note: STC is monitoring the impact of using more administrative data in SEPR. In the interim, users are reminded that employment data from SEPR are best used in the context of longer time periods and for the distribution of industrial employment.

CANSIM tables: 281-0028 and 281-0039

1 Inclut le temps supplémentaire.

2 Non désaisonnalisés. Les données annuelles sont la moyenne des indices mensuels. L'article de l'édition de septembre 1989 de L'OEC décrit en détail la construction de ces indices à pondération fixe.

Note: Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur SEPR. Entre-temps, il est préférable d'utiliser les estimations de SEPR sur une plus longue période de référence et pour la répartition de l'emploi industriel.

**Note:** STC is monitoring the impact of using more administrative data in SEPH. In the interim, users are reminded that employment data from SEPH are best used in the context of longer time periods and for the distribution of industrial employment. The same applies to Table 9.

**CANSIM tables:** 382-0006 and 281-0025

**Note :** Suite à l'augmentation des données administratives dans la composition des estimations, STC étudie l'impact sur l'EERH. Entre-temps, il est préférable d'utiliser les estimations de l'EERH sur une plus longue période de référence et pour la répartition de l'emploi industriel. La même note s'applique au tableau 9.
